### Project Information

**Project Name**

Limited Mobility Beach Access

**Project Description**

Access to various beaches and shore areas are not available for people with limited mobility. Ease of access to allow our aging and disabled population is desirable and should be available. The town's Open Space , Recreation and/or Preservation Committees are asked sponsor projects in various neighborhoods as follows: (1) Short Beach ramp from Life Saving Station over sand to the water. Could be floating trek deck removable off season ,(2) Forty steps - similar to Short Beach from parking lot over stones to water edge (3) Tudor Beach - handicapped ramp next to stairs and ramp to water edge and (4) Bass Point - Public Access route on corner of Nectar and Gardner Rd. Remove brush and expand access to shoreline. Add large platform deck to the left as far back as possible. Add ramp over stones to water's edge. All ramps and decks could be modular and made of plastic material to allow for winter removal. The water and shoreline are the essential and historical draw to Nahant. Yet many of our residents are not able to enjoy the ocean directly as their mobility makes it difficult to navigate the sand and stone. Our resident population is aging and we should help them continue to enjoy our natural beauty. Every neighborhood should have an access point to encourage them to use it close to their homes.
